Subject: RE: Historical analytical data on Amboy Aggregates Sand

This sand analytical data looks good, and let us know when the other analytical comes in. I assume (hope) that Todd pulled the sample from a "representative" location. That is the primary concern, biased samples.

I've reviewed the final air sampling plan too. I'd expect no more changes.

Subject: Historical analytical data on Amboy Aggregates Sand

As requested in this morning's teleconference, attached is the most recent analytical report from Amboy Aggregates depicting the quality of the sand they offer commercially. This sand sample was collected on September 30. Analysis of the specific sand that has been stockpiled by Amboy Aggregates and designated for the RM 10.9 Removal Action cap, is anticipated to be available on October 28.

Please call me if you have any questions.
